MATERIAL SAFETY DATA SHEET

Calcium Hypochlorite

Section 01 - Chemical And Product And Company Information

Product Identifier .......................... HTH® Dry Chlorine Granular

Product Use ................................. Disinfection in swimming pools and drinking water supplies; slime and odour control.

Supplier Name ............................... ClearTech Industries Inc.
2303 Hanselman Avenue
Saskatoon SK S7I 5Z3
Canada

Prepared By ................................. ClearTech Industries Inc. Technical Department
Phone: (306)664-2522

Preparation Date ........................... March 3, 2003

24-Hour Emergency Phone .......... 306-664-2522

Section 02 - Composition / Information on Ingredients

Hazardous Ingredients .................. Calcium Hypochlorite 60-80%
Sodium Chloride 10-20%
Calcium Chloride 0-5%
Calcium Hydroxide 0-4%
Calcium Carbonate 0-5%
Calcium Chlorate 0-5%

CAS Number ............................... Calcium Hypochlorite 7778-54-3
Sodium Chloride 7647-14-5
Calcium Chloride 10043-52-4
Calcium Hydroxide 1305-62-0
Calcium Carbonate 471-34-1
Calcium Chlorate 10137-74-3

Synonym (s) .................. Calcium oxychloride; chlorinated lime; hypochlorous acid; Chloryte; Chlor-tabs; Sock It dry chlorine granular

Section 03 - Hazard Identification

Inhalation ................................. Dust and mist irritate the nose and throat. In confined areas, mechanical agitation can result in high levels of dust, and reaction with incompatibles materials (e.g., acids and water/moisture) can result in high concentrations of chlorine vapour, either of which may result in burns to the respiratory tract, producing lung edema, shortness of breath, wheezing, choking, chest
pains, impairment of lung function, and possible permanent lung damage.

**Skin Contact / Absorption**

Calcium hypochlorite dust and solutions can cause irritation and in severe cases, chemical burns, which are characterized by redness, swelling, and scab formation. Moisture from perspirations will accelerate tissue destruction.

**Eye Contact**

Exposure to calcium hypochlorite can cause eye irritation and vision impairment. Contact can produce impairment of vision and corneal damage.

**Ingestion**

When ingested, there will be burning of the mouth and throat. Can cause abdominal cramps, vomiting, diarrhea, nausea, and/or tissue ulceration which may lead to convulsions, coma, and even death.

**Exposure Limits**

Ceiling = 3 mg/m³ as chlorine (manufacturer's internal standard)

---

### Section 04 - First Aid Measures

**Inhalation**

Remove victim to fresh air. Give artificial respiration only if breathing has stopped. If breathing is difficult, give oxygen. Seek immediate medical attention.

**Skin Contact / Absorption**

Remove contaminated clothing. Wash affected area with soap and water. Seek medical attention if irritation occurs or persists.

**Eye Contact**

Flush immediately with water for at least 20 minutes. Forcibly hold eyelids apart to ensure complete irrigation of eye tissue. Seek immediate medical attention.

**Ingestion**

Immediately give large amounts of water. Do not induce vomiting. If vomiting occurs, lean victim forward to prevent breathing in vomitus. Do not give anything by mouth to an unconscious or convulsing person. Seek immediate medical attention.

### Section 05 - Fire Fighting

**Conditions of Flammability**

Non-flammable. Calcium hypochlorite is a strong oxidizing agent; may form explosive mixtures with combustibles, organic, or other oxidizable materials.

**Means of Extinction**

Drench with water, and cool surrounding products and area with water. Avoid dry extinguishers containing ammonium compounds.

**Flash Point**

Not Applicable

**Auto-ignition Temperature**

Not Applicable

**Upper Flammable Limit**

Not Applicable

**Lower Flammable Limit**

Not Applicable
Hazardous Combustible Products. Chlorine, oxygen, and chlorine monoxide at higher temperatures. Water in contact with hot calcium hypochlorite can release hydrochloric acid or chlorine gas.

Special Fire Fighting Procedures... Wear NIOSH-approved self-contained breathing Apparatus and protective clothing.

Explosion Hazards.................... Not sensitive to mechanical impact or static discharge.

Section 06 - Accidental Release Measures

Leak / Spill.................................. Wear appropriate personal protective equipment. Ventilate area. Only enter area with PPE. Stop or reduce leak if safe to do so. Prevent material from entering sewers.

Deactivating Materials................. Hydrogen peroxide, sodium sulphite, or sodium bisulphite.

Section 07 - Handling and Storage

Handling Procedures.................... Use proper equipment for lifting and transporting all containers. Use sensible industrial hygiene and housekeeping practices. Wash thoroughly after handling. Avoid all situations that could lead to harmful exposure.

Storage Requirements.................. Store in a cool, dry, well-ventilated place. Keep container tightly closed, and away from incompatible materials. Keep out of the sun.

Section 08 - Personal Protection and Exposure Controls

Protective Equipment

Eyes........................................... Chemical goggles, full-face shield, or a full-face respirator is to be worn at all times when product is handled. Contact lenses should not be worn; they may contribute to severe eye injury.

Respiratory................................. Use NIOSH-approved respirator - full facepiece with chlorine and dust/mist cartridges when dust is present. Use a self-contained breathing apparatus should be used for major spills.

Gloves...................................... Impervious gloves of chemically resistant material (rubber or PVC) should be worn at all times. Wash contaminated clothing with soap and water, dry thoroughly before reuse.

Clothing................................. Body suits, aprons, and/or coveralls of chemical resistant material should be worn at all times. Wash contaminated clothing with soap and water, dry thoroughly before reuse.

Footwear................................. Impervious boots of chemically resistant material should be worn at all times
Other................................................. No other information available

Engineering Controls

Ventilation Requirements........... Mechanical ventilation (dilution or local exhaust), process or personnel enclosure, and control of process conditions. Supply sufficient replacement air to make up for air removed by exhaust systems.

Other................................................. Emergency shower and eyewash should be in close proximity.

Section 09 - Physical and Chemical Properties

Section 10 - Stability and Reactivity

Stability........................................... Stable. Heat and contamination could cause decomposition.
### Incompatibility
Acids, reducing agents, combustible materials such as wood, cloth, or organic materials, dry powder fire extinguishers containing monoammonium phosphate, metals such as iron and copper and their alloys, water or steam, ammonia, urea, amines.

### Hazardous Products of Decomposition
Water in contact with calcium hypochlorite releases chlorine gas. Contact with incompatibles presents an explosion and fire hazard. Toxic or corrosive fumes may be liberated. These include chlorine gas.

### Polymerization
Will not occur

Section 13 - Disposal Considerations

Waste Disposal

Dispose in accordance with all federal, provincial, and/or local regulations including the Canadian Environmental Protection Act.

Section 14 - Transportation Information

TDG Classification

Class
5.1

Group
II

PIN Number
UN2880

Other
Secure containers (full and/or empty) with suitable hold down devices during shipment.

Section 15 - Regulatory Information

WHMIS Classification
Product is packaged as a consumer product.

Note: The product listed on this MSDS has been classified in accordance with the hazard criteria of the Canadian Controlled Products Regulations. This MSDS contains all information required by those regulations.

Section 16 - Other Information

Note: The responsibility to provide a safe workplace remains with the user. The user should consider the health hazards and safety information contained herein as a guide and should take those precautions required in an individual operation to instruct employees and develop work practice procedures for a safe work environment. The information contained herein is, to the best of our knowledge and belief, accurate. However, since the conditions of handling and use are beyond our control, we make no guarantee of results, and assume no liability for damages incurred by the use of this material. It is the responsibility of the user to comply with all applicable laws and regulations.
