

# BECS WATER CHEMISTRY CONTROLLERS

## BECSys3

An entry level controller, light duty, simple to operate, will do a great job of automating ph and chlorine feed. Simple, basic, and well priced.

### FEATURES:

- Ph and ORP controller
- LED display, 1 line
- 3 relay outputs, solid state, 3 amp
- Probes, flowcell, and flowswitch included

### PROGRAMMABLE:

- Set Points
- Acid/base feed
- Proportional or on/off feed
- Flowswitch feed lockout, overfeed timers
- Ph and calculated ppm calibration
- Password protected, 2 levels
- Temperature sensor optional
- No computer communications abilities

Item No	Description	Price
12 18 30	BECSys3	\$2795.00

## BECSys5

A sophisticated controller, but complicated programming, Also monitors, heaters, chemical levels, and flow. (with optional sensors) Also calculates water balance, and does data logging, and has computer communications capabilities. (optional)

### FEATURES:

- Ph, Orp, and optional PPM controller
- Multiline LCD screen
- Probes, flowcell, and flowswitch included
- 4 relay outputs, solid state, 3 amp

### PROGRAMMABLE:

- Set Points, including ppm (optional)
- Acid/base feed
- Proportional or on/off feed
- Flowswitch feed lockout, overfeed timers
- Password protected, 3 levels
- Data logging capabilities
- Computer communication capabilities (optional)

Item No	Description	Price
12 18 31	BECSys5 no modem	\$5610.00
12 18 32	BECSys5 with modem and software	\$6555.00
