

Durafirm Diving Stands

Durafirm stands are fabricated from cast aluminium (frame) and stainless steel (railings); both materials stand up to institutional use very well.

The most important single feature of Durafirm stands is the simple 8-point deck anchorage, which requires no special footings and can be installed on an existing deck, if concrete is of good quality and no less than 4½" thick. This is the easiest stand to install in a retrofit situation on an existing deck.

Both one and three meter stands have hinged board anchors which allow easy tilting of the board up to 180° to clear the pool edge during other activities such as swim meets and water polo matches.

The one-meter stands are available in several side railing configurations; we recommend double guardrails on two sides (pictured here). All 3 meter stands are supplied with double guardrails.

Durafirm stands are manufactured in different heights to accommodate pools with deck to water level dimensions from 1" to 13". Deck to water level dimension of the pool must be indicated when ordering.

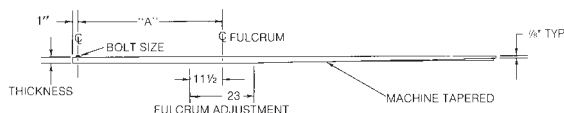

Item No	Description	Price
16 10 01	1 Meter Stand *	\$9747.65
16 10 02	3 meter Stand *	\$19,515.25

*Includes anchors.

Note: Diving boards are sold separately from stands & are not included in stand prices.

DURAFLEX® DIVING BOARDS

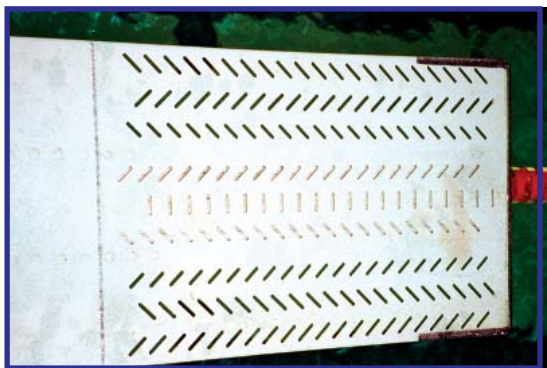

Duraflex's family of diving boards is the acknowledged standard for use in public facilities. From general recreational use to very high-level competition, they are the best choice for public pools.

Duraflex® Board

The standard Duraflex board tapers from tip to fulcrum and then maintains the thicker section from fulcrum to butt. This construction yields less spring than the higher competition boards but more long lasting. This is the board recommended for general recreation use.

Item No	Description	Price
16 11 01	Duraflex® 14' A = 63 1/4"	\$3847.35
16 11 02	Duraflex® 16' A = 78"	\$4067.50

Maxi-Flex® B

The Maxi-Flex Model "B" is a double tapered aluminium board for maximum spring. In addition there are approximately 200 perforations measuring approximately 1½ inches long and ¼ inch wide, extending 25 inches back from the tip end of the board. This feature results in an even more lively board, making it the choice of divers worldwide. For applications where dive club needs are the primary concern, the MAXI B is recommended.

Item No	Description	Price
16 11 04	Maxi-Flex® "B" 16' A = 73"	\$4695.00
