

## Dolphin Vacuums

Maytronics has built robot style commercial pool vacuums the longest and Dolphin vacuums are the best in this product category. Dolphins are now DC powered improving both reliability and safety.

### Dolphin HD

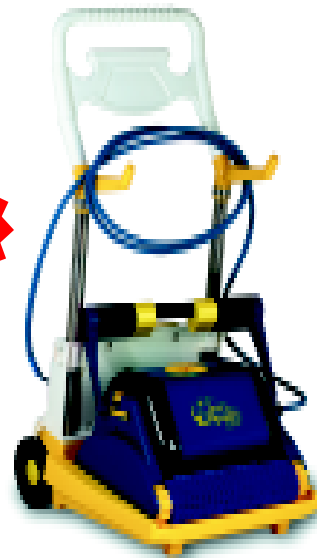

The Dolphin HD is a Dolphin 3001 with a few differences to make it a more economical unit. The Dolphin HD, like the 3001, is supplied complete with a caddy cart, transformer & filter bag, there is nothing else to buy.

The most noticeable difference is a shorter standard cord (80 ft. long vs. 100 ft.). The second difference is work cycle HD is preprogrammed for 5 hours, the 3001 for 6 hours. This is desirable because HD cleans a standard 25-meter pool in 5 hours or less; in fact shorter run times mean longer vacuum life (in years). The shorter work cycle actually helps you ensure the HD lasts longer.

The HD also has the zero depth features allowing it to reverse back into the water in a zero depth pool. The warranty for HD is 2 years or 2000 hours.

All in all, Dolphin HD is great value at rock bottom pricing!!

Item No.	Description	Price
14 19 03	Dolphin HD 80' cord	\$2895.00
14 19 04	Dolphin HD 100' cord	\$3195.00

### Dolphin DC Diagnostic (formerly 3001)

The Dolphin DC Diagnostic vacuum is designed to vacuum and scrub the pool; including the walls. The 3001 is programmed for a 6 hour cycle; it also will reverse direction when it approaches zero depth, making it suitable for 'beach front' pools.

Supplied with a 30 meter cord, an extra filter bag and a caddy cart the Dolphin arrives complete and ready to go. Warranty is 2 years or 3000 hours of operation whichever comes first.

Typically in a municipal application, labor saved with a Model DC Diagnostic robot vacuum pays for the cost of a Dolphin in 9 to 16 months.

Item No.	Description	Price
14 19 01	Dolphin DC Diagnostic	\$3495.00

### Dolphin Dynamic Pro (formerly 3002)

This is the best commercial pool robot we have seen!! The remote control for this vacuum allows user to input program choices to customize operation for a specific pool. Input settings include: climbing walls (on or off), length of cleaning cycle (2, 3 or 5 hours) and pool size (10, 15, 20 & 25 M).

The transformer, the main circuit board and the cleaning program are upgraded for a longer life and efficiency. The transformer has indicator lights giving status information at a glance: on/off indicator and filter bag change indicator. The program upgrade results in a much more efficient cleaning pattern - you get a cleaner pool in less time.

The Dynamic Pro is supplied with a cord swivel to eliminate twisting. And the Dynamic Pro also reverses direction when it approaches zero depth, making it suitable for 'beach front' pools.

Supplied with a 30-meter cord, an extra filter bag and a caddy cart; the Dolphin arrives complete and ready to go. Warranty is 2 years or 3000 hours of operation which ever comes first.

Typically in a municipal application, labor saved with a Dynamic Pro robot vacuum pays for the cost of a Dolphin in 12 to 20 months.

Item No.	Description	Price
14 19 02	Dolphin Dynamic Pro	\$4195.00
