

GAS DETECTORS

MAC Mini-Analog Stand Alone Gas Detection System

The MAC series of gas detectors continuously monitors chlorine, ammonia or ozone at one or two remote locations. The units incorporate a digital display, audible alarm with silence button and two alarm relays, all in a watertight enclosure. A power supply is included. The detectors have electrochemical sensors in the following ranges. Chlorine 0-5 PPM, Ammonia 0-500 PPM and Ozone 0-2 PPM. Optional analog outputs are available.

CHLORINE GAS DETECTORS

Item No	Description	Price
12 25 01	Single Remote Sensor	\$1554.00
12 25 02	Two Remote Sensors	\$2688.75

AMMONIA GAS DETECTORS

12 25 03	Single Remote Sensor	\$1989.40
12 25 04	Two Remote Sensors	\$3436.95

OZONE GAS DETECTORS

12 25 05	Single Remote Sensor	\$1989.40
12 25 06	Two Remote Sensors	\$3436.95

OPTIONS

12 25 07	Remote Mount Strobe/Siren Combo	\$165.00
----------	---------------------------------	----------

Replacement Sensor Element for AST Series Sensors

12 25 09	Chlorine	\$335.85
12 25 10	Ammonia	\$773.25
12 25 11	Ozone	\$697.25

Other sensors quoted on request.

3 or 4 Channel or mixed systems quoted on request

Hand Held Portable Chlorine Gas Detectors

These RKI model SC-01 units are small, run on two AA batteries, and sense chlorine by the electrochemical method in the range of 0 to 3.0 ppm in 0.2 ppm increments. Response time is 90% in one minute. They are CSA approved. The unit has alarm lights, alarm buzzer, and vibrates on alarm. Batteries are user replaceable, units can be recalibrated, and sensors are replaceable. The life of the sensors is dependant on how much chlorine they are exposed to, more chlorine exposure equals shorter sensor life. They can be returned to Commercial Aquatics for recalibration or repairs. Where combined spaces or portability are required these are nice little units that can be worn on a belt. Belt clips included.

Item No	Description	Price
12 25 50	RKI Handheld CL2 Gas Detector	\$1249.50
