

INFLATABLES

Please see the website www.safetyauthority.ca for information on regulations, permits and licenses etc.

Commercial Aquatic Supplies has been appointed the Canadian Distributor for the AFLEX Line of Inflatables from New Zealand. A few are pictured below to wet your appetite, and lead you to the website (www.commercialaquaticsupplies.com tab Inflatables, where the full range is shown, with specifications. Aflex Inflatables are divided into three categories. The Airflow Inflatables are large structures that require a blower running constantly to keep them inflated. Sealed Inflatables are blown up and then capped, and are more mobile, and typically smaller. Modular Sealed Inflatables are designed to be used independently, or fastened together into larger play structures, as more are acquired, and space permits. Large Inflatables are typically made to order, so colors and size can be customized. (Large inflatables are heavy, and should not be dragged across the pool deck. Consider buying a low warehouse dolly to transport these items around the facility.) Delivery is typically 4-5 weeks after receipt of order. Freight is extra and quoted when the model and destination are known. Inflatables come with a tube made as part of the inflatable to connect to the blower, (it is 25' long) a patch kit (less glue) and a paper copy of the instructions. Blowers, glue, freight, and taxes are added as needed for each application.

Air Flow Inflatables
