

SPECIALTY MAINTENANCE PRODUCTS:

Safe-T-Tread - by 3M

Some times called grip tape it has many uses around a pool. 3M's product is still the best, it is a peel and stick material that can be used virtually any place a slip hazard needs to be eliminated. Use it on walkways, step treads slippery tiles and some customers have used it on the end of an old dive board. Product is supplied in various widths in rolls of 60 feet. There are two techniques for success with Safe-T-Tread at an aquatic center. First the product will work in wet areas (even under water) if 3M's Edge Seal is used to prevent water migrating underneath. And second, always cut corners to round since 90° corners seem to peel up easier.

Item No	Description	Price
12 01 30	2" x 60' roll (black only)	\$126.50
12 01 31	4" x 60' roll (black only)	\$238.50
12 01 32	Edge Seal (100 ml tube)	\$18.50
12 01 33	12" wide - per foot - black only	\$12.95

Stainless Steel Treatment-Cleaning & Corrosion Prevention

Stainless Steel, when properly cared for will over time form a passive layer of chromium that prevents surface corrosion and rust, making the material more resistant to corrosion the older it gets. Spectrum pool products as of 1 January, 2010 also come treated with an exclusive product called Spectra Shield, which works by coating the Stainless Steel, further increasing its corrosion resistance. It is an undetectable, microscopic coating that cannot be removed by water or cleaning. The best news is that it can be applied to older stainless steel, once it has been cleaned and dried, to increase its corrosion resistance, and reduce cleaning requirements.

The product 77+ is a liquid cleaner for pitted or stained, (rusty) stainless, and 2310 Gel is a similar cleaner, only thicker for use on vertical surfaces. It needs to cling allowing time for the chemical to do the work. Apply the cleaner, allow time for the product to dissolve the stains, and rinse off with water. 3050 is a more concentrated form of the product used primarily for cleaning stainless steel boilers.

Item No	Description	Price
12 01 36	77+ Spray, 22 oz spray bottle	\$35.95
12 01 37	77+ Spray, Refill 1 Gallon	\$79.95
12 01 42	77+ refill 5 Gallon	\$275.00
12 01 38	2310 Gel, 1 Gallon	\$92.25
12 01 39	3050 1 Gallon	\$104.95
12 01 40	3050 5 Gallons	\$379.95
12 01 41	Spectra Shield/Rust Rescue 200 #57373 1 Gallon	\$165.00
12 01 42	Copper Sulfate Test Kit (tests for free Iron on Stainless Steel surfaces)	\$49.50

3M Plastic Scrubbies

Item No	Description	Price
12 01 26	Fine Stainless Grade Scrubby White (Use where corrosion has not broken surface of stainless)	\$30.00 (10 pieces) \$150.00 (box of 60)
12 01 27	Medium Stainless Grade Scrubby Maroon (Use where corrosion has got hold)	\$30.00 (10 pieces) \$150.00 (box of 60)

A/B Epoxy Putty

This is an excellent product for aquatic centers. A/B Putty hardens in wet areas (even under water) and adheres very well to virtually any substrate. Uses around an aquatic center include: temporary patch on a filter, refasten a tile that has come loose (change room floor or under water), filling a crack in pool concrete, etc.

Item No	Description	Price
12 01 10	14 oz Epoxy Putty	\$28.95
