

THERMAL-KING BLANKET:

# POOL COVER SYSTEMS

## Pool Blankets

Covers save money by eliminating heat loss thru evaporation. A well-designed cover system that is quick to install & remove will pay for itself in a short time (varies with application). Covers are built specifically for each application; allow 4 weeks for fabrication & shipping.

**Choose from two grades of cover:**

**THERMAL-KING:** Woven layers are 12 by 12 threads per inch, and applied to both sides of the insulating foam for extra strength. Thermal-King blankets are expected to last 6 to 10 years depending on application. Thermal-King supported by a 2 year limited warranty. Edging on all four edges, c/w grommets on two ends is included in the price.

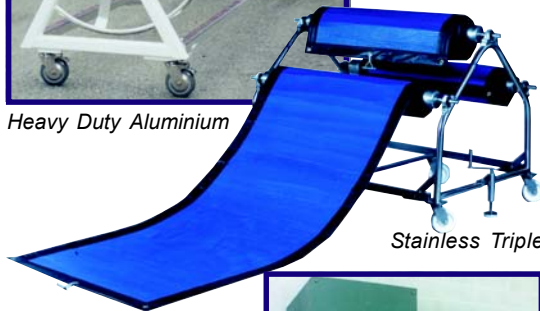

**SWIRL POOL COVERS:** Covers can be used on hot tubs overnight for significant savings in heat and evaporation. Use home pool blankets which are sold in a rectangle then trimmed on site to fit the shape of specific application. Covers last a shorter time in warm highly chlorinated swirl pool water. Call with your hot tub size for pricing.

**Pricing is FOB Factory.**

Item No	Description		Price
16 21 01	Thermal-King	47129	\$2.35/ft <sup>2</sup>
16 21 05	Attachment straps 18"	50021	\$30.25

Heavy Duty Aluminium

Stainless Triple

## Commercial Blanket Rollers

Choose from several roller solutions that together offer a roller for virtually any application. All rollers FOB Factory.

**HEAVY DUTY ALUMINIUM ROLLER:** Capacity for one 25 meter pool (250 linear ft.); large 36-inch captains wheels at each end. Solid construction, 5" casters.

**STAINLESS STEEL ROLLER DELUXE:** Capacity for 164, 328, 492 feet on single, double or triple all stainless roller.

**STAINLESS WALL MOUNT ROLLER:** Designed to support up to 50 meters of wet blanket on the wall, off deck & out of the way. Use one unit for each section of blanket. Crank extension allows unit to be mounted over 6 feet where required.

**MOTORIZED WALL MOUNT ROLLER:** Considered semi automatic, a hand held transmitter controls motor to provide smooth deployment and retrieval of blanket while guided by one staff member. Both faster and easier, this system pays for itself by minimizing staff time required to install & remove blankets each day. Typical 25-meter pool would use two units removing blankets of up to 25 feet wide.

Item No	Description	Price
16 22 04	HD Aluminium Roller (specify blanket width to 20')	\$3250.00
16 22 07	Stainless Double Roller (specify blanket width to 18')	\$POR
16 22 08	Wall Mount (specify blanket width to 25')	\$POR
16 22 09	Motorized Wall mount (specify blanket width to 25')	\$POR

## Suitmate

The Suitmate bathing suit spinner is designed to quickly spin dry a bathing suit so pool patrons don't have to take home soaking wet bathing suits. An 8 second spin removes 95% of the water. Facilities mount these units on a wall and everyone can drop their suit in and spin dry it. Very safe to use, the Suitmate will only work when the lid is closed, and pressed down, and no heat is involved. The wetted parts are stainless steel, the cabinet is metal and plastic. Requires 110 volts. Size is 15" by 15" by 23" tall. The wall mounting bracket is included.

Item No	Description	Price
16 23 50	Suitmate	\$2235.50
