

STRANTROL by Siemens

Siemens are the new owners of Stranco. They have recently added several new companies to their water treatment division, as usual buying the best and adding to it. We are pleased with the new owners and continued dedication to product innovation and quality, and expanding product line. Strantrols by Siemens are reliable, fully functioned controllers, of up to date design. The software is easy to use, the hardware, both probes and controller designed for a long trouble free working life.
