## New System? Replacement System? Part? Service?

Gas chlorine is still the least expensive form of Cl<sub>2</sub>, it is also the only form of chlorine that does not contain by-products that increase the TDS of pool water.

Commercial Aquatic Supplies can provide product and price information for a new or replacement system to suit your application. We are also a parts and service centre for any of the well-known brands. Whether your system is a Wallace & Tiernan, Fischer & Porter or Capital/Advance, we can supply parts or complete service at our shop, by expert technicians.

## Superior Gas Systems

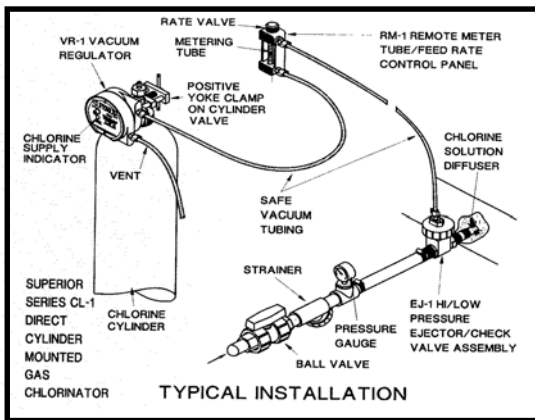

Superior Gas Chlorinator systems by Chemical Injection Technologies Inc. use the same principals of vacuum operation as the other major brands.

Superior is unique in using a simpler design that requires fewer parts. This more modern design and excellent quality makes the Superior Gas Chlorinators less expensive to buy and less expensive to maintain.

Consider a whole new system or just replace old components as the need arises.

All vacuum gas chlorinators work on the same principles, so Superior components (tank unit, ejector, etc.) can replace similar components of all brands currently in use at your facility.

Superior supports gas systems and complete individual components with a three year warranty.
