

# WATER POLO TIMING SYSTEM

WATER POLO

Maric's water polo timing system is made up of two main components the timer and the shot clock system. These can be ordered together as a complete system or separately as budget allows.

Maric is reliable and built rugged for commercial applications. Features include:

- State of the art Intel microprocessor controlled networkable system
- Portable indoor/outdoor displays featuring rugged weatherproof construction with protective powder coat finish
- Optional DC power available in combination with AC power

## Maric Game Timer/Scoreboard

The Maric score board and game timer is supplied with a controller and 25 foot cord. Offers game timing functions and score keeping for 'home' and 'guest'. System is portable, it can easily be seen from distances up to 400 feet and horn is built into the display.

The game timer is programmable and can offer the facility use in other events; functions include count down or count up timing for any event as well as use as a digital pace clock.

The shot clock system that works with this timer is sold separately – see shot clock listing.

Item No	Description	Price
21 07 01	W/P Score Board & Game Timer MD4656SB	\$3280.00
21 07 05	W/P Game Timer MD46GT	\$1995.00

## Maric Shot Clock System

The shot clock system consists of two 2-digit displays, a programmable countdown control box and 2 cables (50ft. & 200ft.). Each display has a built in horn and rust proof legs. Maric has proven itself a reliable performer over the years. Down the road, a game timer and scoreboard can be added to this shot clock system.

Item No	Description	Price
21 07 02	W/P Shot Clock System MD26ST	\$2932.95

Game Timer Only
