

TIMING SYSTEMS - BY COLORADO TIMING

Pricing is FOB Colorado

Colorado is a world leader in computerized timing systems. The System 6 is Colorado's sixth generation system offering state of the art performance and design flexibility.

Combine three components to create a system that suits your facility. Choose between a button or touch pad system, then add a score board and start system. Colorado's System 6 allows you to start with a basic system and add features over time. For example touch pads can be added to the button system at any time, if you start with a one line score board you may add extra lines at any time and there are a variety of options on page 104 that can be added when needed (water polo, etc.). **Note: pricing is FOB Loveland**

**US Dollars translated at 1.0000
for this price list.**

Button Systems

Includes Timer, Carrying Case, Cable Harness, two Buttons per Lane and manual.

Item No	Model	Type	Price
20 15 02	SYS 6-6	6 Lane System	\$5555.00
