Water Level Controller-Ultrasonic

The LIT 25 (Level Indicating Transmitter) by Greyline uses a non-contacting ultrasonic signal to sense water levels, and has a range of 32' or 10M. The standard cable length is 25'. The electronic controller is small, only 6.18" high by 4.21" wide and 3" deep. The case is water & dust tight, the display is large, and can be inches or centimeters. The unit provides a relay to control the pump or valve used to adjust the water level. A 4-20ma signal available for BMS connection if desired. Simple 2 button calibration and set point programming. Runs on 110 VAC power. A low cost unit that is highly accurate.
