

GAS CHLORINE EQUIPMENT

New Systems, Replacement Parts, & Service

Gas Chlorine is still the least expensive form of Chlorine and the only form of chlorine that does not contain byproducts that increase the TDS of pool water as chlorine is being added. Commercial Aquatic Supplies can provide price and product information for new or replacement systems, and can also supply parts, or complete repair services.

Superior Gas Systems

Superior Gas Chlorinator systems by Chemical Injection Technologies Inc. use the same principals of vacuum operation as the other major brands.

Superior is unique in using a simpler design that requires fewer parts. This more modern design and excellent quality makes the Superior Gas Chlorinators less expensive to buy and less expensive to maintain.

Consider a whole new system or just replace old components as the need arises.

All vacuum gas chlorinators work on the same principles, so Superior components (tank unit, ejector, etc.) can replace similar components of all brands currently in use at your facility.

Superior supports gas systems and complete individual components with a three year warranty.
